

MSD is a global health care leader with a diversified portfolio of prescription medicines, vaccines and animal health products. The Prague IT Hub (MSD IT) employs more than 750 people and drives the direction of the digital revolution in healthcare. We support the entire company with our expertise in software engineering, networking, and digital marketing by creating multi-platform applications and mathematical models for sales, research, business analysis, and development of medicine.

Our **IT ETR (Emerging Talent Rotational) Program** allows fresh graduates to experience three **full time rotations** over a two and a half year period (one half year, two full years) in various **IT business areas** and work locations. Each individual will be partnered with a buddy and an executive mentor who will be able to help with acculturation at MSD IT and career planning. Rotations are assigned based on the individual's development interest, discussion with the mentor and alignment with business needs.

Who are we looking for?

- Recent Bachelor's or Master's degree graduates (you should have your Bachelor or Master degree for no more than 2 years)
- Degree should be in Science, Technology, Engineering, Math, Business, Computer Science (or similar)
