

We want you!

Quality Engineer

mgm has been developing web applications for more than 20 years: eCommerce, Insurance and eGovernment. More than 500 colleagues at our locations in Munich, Nuremberg, Hamburg, Cologne, Berlin, Leipzig, Dresden, Prague, Grenoble, DaNang and Washington represent our vision: Innovation Implemented.

We are looking for individuals who are capable of taking on responsibility. Our work is characterized by the commitment and engagement of individuals active in implementation driven teams. This enables us to take on complex tasks and master them in an intelligent manner. Does this outline your capabilities and strengths? Then we should get to know each other soon!

Your tasks

- Quality assurance and documentation of web applications – mainly in Java-based technologies
- Preparation and maintenance of software test specifications
- Software testing, issue reporting and tracking
- Collaboration with business analysts and the QA team

We offer you

- Interesting tasks and projects
- A nice and friendly team
- Independent, autonomous work
- Continuous learning at the job
- Flexible working hours, with home office option
- Ideal working environment with 2 monitors and endless coffee supply
- *Possibility to work part-time in case you are still studying*

What you should bring

- Degree in engineering or natural sciences (university or technical college)
- Excellent English, both written and spoken
- Analytical skills
- Software testing experience, SQL, Linux basics are an advantage
- Sense of responsibility, communication skills and team spirit
- Willingness to learn new things and interest in IT technologies

We look forward to receiving your application.
